Cool computer stuff

Keyboard

- Remap caps lock key
    - system preferences -> keyboad -> modifier keys
- set `key repeat` and `delay until repeat` to short and fast
- Some shortcuts:
    - `cntrl + A` -> Beginning of line
    - `cntrl + E` -> End of Line
    - `cntrl + D` -> Delete forward
    - `cntrl + F,B,P,N` -> Move cursor Forward, Backward, Up, and Down

iTerm

- **Hermahgerd use fullscreen!**
- `cmd + return` -> Fullscreen mode
- `cmd + D` -> Split panes vertically
- `cmd + shift + D` -> Split panes horizontally
- `cmd + ~` -> Switch between fullscreen iterm windows

Open Sublime from iTerm

- `alias subl='open -a "Sublime Text 2"'`
- `subl .` -> Opens current dir in Sublime

Sublime Text

- `cmd + option + arrow keys` -> move lines around
- `cmd + D` -> select word where cursor is
    - repeat to select multiple instances
- `cmd + shift + D` -> Duplicate current line
- `cmd + T` -> Opens file pane
- `cmd + shift + P` - > Opens package manager
- `cmd + f` -> Search current file
- `cmd + shift + f` -> search entire project
- `cmd + R` -> Opens current file pane
- `cmd + option + number` -> Split window into multiple Panels (vertical)

- `cmd + option + shift + number` -> Split window into multiple Panels (horizontal)

Aliases

- Place these in your ~/.zshrc file if you like being lazy

- `alias gs="git status"`

- `alias ga="git add"`
- `alias gc="git commit"`
- `alias gp="git push"`
- `alias rs="rails s"`
- `alias rc="rails console"`
- `alias finder="open --reveal ."` -> opens current dir in finder
